

30th, 2022. As such, WisDOT is now soliciting for local program construction projects only; funding for design will not be considered in this solicitation to use FFY22 federal funding. If a construction project is ultimately selected to use FFY22 funding, project sponsors must submit project Plan, Specification, and Estimate (PS&E) packages no later than August 1, 2022 to facilitate project construction lettings that will meet federal obligation deadlines.

To be considered for FFY22 funding, local agencies must apply by April 1, 2022. Applicants must be able to demonstrate the ability to submit project Plan, Specification, and Estimate (PS&E) packages no later than August 1, 2022 to facilitate project construction lettings that will meet FFY22 funding obligation deadlines. If the August 1, 2022 PS&E deadline cannot be met, there will be future opportunities for local agencies to apply for BIL dollars when there is not a compressed timeline. A subsequent solicitation will be made available later in February 2022 that will consider project applications for FFY23 and forward. The solicitation in February will be for both construction and/or design and construction applications.

There will be an informational webinar regarding this FFY22 BIL project solicitation. Information on the FFY22 webinar will be provided later this week.

Program eligibility guidelines and application materials can be found on the WisDOT Local Assistance Programs BIL webpage:
