

NOTE re: FRUNCILLO Class A

My understanding is that a relative of the Fruncillo's has operated this STR for many years (before enforcement of any regulations) known as "Casa Cranberry." The Fruncillo's desire to bring the STR into compliance with the rules. They have a license from the Health Department and have applied for an initial Clover STR license. They have not filed the Class A permit application with Bayfield County, but will do so. Because this is routine and cannot be denied, the TPC can go ahead and address this and recommend any appropriate conditions to the Town Board as if the Class A permit application were filed.

A search on Septic Search shows ownership of Arthur and Susan Fruncillo, with a holding tank last pumped 8/15/23 by Birch Street Excavating and Septic Service.
